Jonathan Swift **VIAGENS DE GULLIVER**

Lemuel Gulliver, a surgeon-physician, speaks to the reader and explains that he will recount his experiences at sea. He recalls his youth, his education and his marriage to Mme. Mary Burton, and her reasons for telling these stories. In fact, it's just a way of recording memories of him, nothing more.

On his first trip, he faced a terrible storm, which caused him to be thrown overboard clutching a piece of wood. After a full night of swimming, he arrives at an island and falls asleep on the beach. The next day, when he wakes up, he finds himself tied to the ground by countless ropes and sees hundreds of tiny men all around him. They say that Gulliver is in a country called Lilliput. As they had never seen a giant like him, they concluded that he could be dangerous and tied him up as a precaution. After much conversation, Gulliver is released and taken to the capital, where he slowly adapts to life in that country, with numerous difficulties in terms of food and accommodation.
